

## BESS tender price in Iran 2025

What is a Bess tender? Standalone BESS tenders are the primary mechanism for enhancing the capacity credit of existing VRE systems integrated with the grid. Following an initial period of aggressive bidding by new market entrants, tariffs have stabilised in the range of Rs. 0.22-0.28 mn/MW/month for 2h systems. How many global Bess tenders are there? We have identified 43 global bess tenders from the public procurement domain worldwide. View the latest global tenders for bess from Africa, the Americas, Asia, Australia, Europe, the Middle East, and other countries. How much does Bess cost? The cost of BESS has fallen significantly over the past decade, with more precipitous drops in recent years: This is nearly a 70% reduction in three years, owing to falling battery pack prices (now as low as \$60-70/kWh in China), increased deployment, and improved efficiency. Are Bess tariffs competitive? Current standalone BESS tariffs are competitive when compared to alternative sources of high-quality baseload power, such as thermal power. This competitiveness is contingent on two key factors: the availability of inexpensive Li-ion batteries from China and the provision of a 40% VGF (up to Rs. 2.7 mn/MWh). How many Bess tenders have been floated? Total BESS tenders of 31 GWh have been floated between Mar'22 and Mar'25 by Union & State agencies, of which 4.9 GWh is awarded. The largest awarding authorities include NTPC, GUVNL. Most awards are for the 2h/2 cycle configuration, though 4h/2 cycle tenders are beginning to dominate. How much did CGN new energy pay for Bess? In January, CGN New Energy procured 4.5 GWh of grid-forming BESS and 6 GWh of grid-following BESS. In the first group, the bids averaged CNY 0./Wh (\$84/kWh), while in the second one the average was CNY 0.489/Wh (\$67/kWh). As of most recent estimates, the cost of a BESS by MW is between \$200,000 and \$450,000, varying by location, system size, and market conditions. This translates to around \$200 - \$450 per kWh, though in some markets, prices have dropped as low as \$150 per kWh. As of most recent estimates, the cost of a BESS by MW is between \$200,000 and \$450,000, varying by location, system size, and market conditions. This translates to around \$200 - \$450 per kWh, though in some markets, prices have dropped as low as \$150 per kWh. As of most recent estimates, the cost of a BESS by MW is between \$200,000 and \$450,000, varying by location, system size, and market conditions. This translates to around \$200 - \$450 per kWh, though in some markets, prices have dropped as low as \$150 per kWh. Key Factors Influencing BESS Prices

How do you determine the price of the Global Project Tracker subscription? The cost of Global Project Tracker subscription varies based on factors like the number of users, regions, sectors, project development stages, and additional features or services included in the package. Contact our sales

The average bid stood at CNY 0.473/Wh (\$65/kWh). Public procurements in China continue to demonstrate exceptionally low price levels for lithium-ion phosphate (LFP) battery energy storage systems (BESS). In the latest tender, more than 80% of bidders quoted prices below CNY 0.5/Wh (\$69/kWh) We have identified 56 global bess tenders from the public procurement domain worldwide.
