

## Solar Inverter project financing options in Yemen 2025

Could the IFC invest in solar power in Yemen? The International Finance Corporation (IFC) is currently evaluating possible investments in this sector in Yemen, which could potentially improve the prospects of launching the first private sector investment in utility-scale solar power under a BOOT model.

### SCALING UP SOLAR ENERGY INVESTMENTS IN YEMEN

What is solar energy investment in Yemen IRG? SCALING UP SOLAR ENERGY INVESTMENTS IN YEMEN IRG areas, consists of short-term contracts (often six months to one year) signed by the PEC with private companies, which own power stations consisting of small diesel generators and which supply electricity to the grid while the government supplies them with the fuel. Is there progress on solar energy in Yemen? However, progress towards this target has been non-existent. At the eighth Development Champions Forum (DCF) in Amman, Jordan, held from October 28 to November 2, , the Development Champions therefore focused on solar energy in Yemen. Who owns a solar power plant in Yemen? They can be owned and operated by the government (or its public utility), or by a private sector company via a Power Purchase Agreement that typically lasts between 5 and 20 years. In Yemen, there are currently no utility-scale solar power plants in existence. Can solar energy reduce the fiscal burden of the Yemeni government? Imports of fossil fuels for electricity generation have placed a significant and increasing fiscal burden on the Yemeni government over the years, in addition to their impact on foreign currency reserves and balance of trade. Solar energy has the potential to address this challenge and reduce the burden. Can the private sector scale up solar power generation in Yemen? As evident in the previous section, the private sector can play a critical role in scaling up solar power generation in Yemen, especially in the utility-scale and mini-grids sectors.

### MOTOMA Launches Strategic Energy Hub in Aden, Yemen
