

average domestic energy storage price per 50MW in Bahamas

How much does electricity cost in the Bahamas? In fact, The Bahamas has one of the highest electricity rates in the Caribbean, with an average cost of around \$0.36 per kilowatt-hour (kWh) in . This is significantly higher than the regional average of \$0.25 per kWh and has placed a considerable burden on both households and businesses. Who owns electricity in the Bahamas? Majority-owned by Emera Inc. Based on average global generation costs for renewable technologies, electricity rates in the Bahamas offer an opportunity for renewable energy to diversify the fuel portfolio and reduce rate volatility. How will the Bahamas reform its energy sector? The Government of the Bahamas has discussed plans to reform its energy sector through a partial-privatization of BEC and by introducing regulation-by-contract principles to meet the capacity for future growth, implementing more economically viable renewable energy sources, and modernizing the energy sector. How much power does the Bahamas have? The Bahamas Electricity Corporation (BEC) controls 438 megawatts (MW) of generation capacity, while Grand Bahama Power Corporation (GBPC) controls the remaining 98 MW. Generation is currently fueled by all imported petroleum with a mix of diesel (56.5%) and heavy fuel oil (43.5%), totaling 1,930 gigawatt-hours (GWh) for the entire country. Will the Bahamas have a solar water heating system? In the next decade, the Bahamas aims to have solar water heating systems on 20% to 30% of all households, which has the potential of adding 200 GWh of heat for water per year. According to preliminary assessments, wind and solar resources offer the greatest potential for renewable energy development in the Bahamas. Why is the Bahamas struggling to diversify its energy mix? One of the key challenges facing The Bahamas in its quest to diversify its energy mix is the high cost of electricity, which is primarily driven by the country's reliance on imported oil for power generation.
