In the SE4 zone of Sweden, the annual average price was EUR 64.88/MWh, while in SE3 it was slightly lower at EUR 51.70/MWh. In SE1 and SE2, the corresponding price was around EUR 40/MWh. Does Sweden have a deregulated electricity market? Sweden has had a deregulated electricity market since 1996. The electricity used in Sweden is created both abroad and locally. However, all electricity is distributed throughout the country through a common electricity network. However, electricity sales are quite competitive, with over 120 suppliers to choose from. Can I Choose my electricity supplier in Sweden? Whatever your reasons, the good news is that in Sweden, you have the freedom to choose your electricity supplier. When you move into a new home in Sweden, you're automatically connected to the local electricity grid, and your electricity is supplied by a default company. However, you're not locked into staying with this company. When did electricity prices rise in Europe & Sweden? The highest daily average prices in SE1 and SE2 occurred in December, while the highest prices occurred in November for SE3 and in January for SE4. Electricity prices in Europe and Sweden were significantly lower in 2023 than in 2022 as a result of the market stabilising since Russia's invasion of Ukraine. In July 2023, revisions were made regarding average prices May for "standard price agreement" and "flexible price agreements". The table shows average offered prices for newly signed contracts excluding electricity tax, VAT, and any potential discount or bonus. In July 2024, revisions were made regarding average prices May for "standard price agreement" and "flexible price agreements". The table shows average offered prices for newly signed contracts excluding electricity tax, VAT, and any potential discount or bonus. As of now, the average electricity price in Sweden is around 65 ¢/kWh. However, this price can fluctuate throughout the year. For instance, in the past year, we have seen an increase in electricity prices due to various factors such as increased demand and changes in global energy markets. Between 2022 and 2023, charges decreased on average by 0.2 per cent for apartment customers and 0.3 per cent for detached house customers using 16 A fuses, while the charges increased by 2.3 per cent for detached house customers using 20 A fuses. This equates to an annual charge change of about SEK 100. This may be due to a number of factors, including high taxes of 0,356 SEK/kWh on electricity, the cost of maintaining a modern and reliable electricity grid, and a focus on sustainability that requires ongoing investment in renewable energy infrastructure. 08/09/ day-
