The data reached From to , the average cost for the module dropped from 36 yuan (\$5) to 1.95 yuan per watt, said the report, which was made public on Monday by the Institute for Carbon Neutrality, Tsinghua University. China aims to peak carbon dioxide emissions before and realize carbon neutrality As of most recent estimates, the cost of a BESS by MW is between \$200,000 and \$450,000, varying by location, system size, and market conditions. This translates to around \$200 - \$450 per kWh, though in some markets, prices have dropped as low as \$150 per kWh. Key Factors Influencing BESS Prices As we approach Q2 , China's average solar panel costs stand at \$0.12-\$0.15 per watt for residential systems - that's 35% cheaper than U.S. equivalents.
