It is this appalling situation that has led many Zambians to seek alternatives to what is supplied by the national grid. What is a solar inverter? As stated earlier, a solar Inverter consists of a number of solar panels, electrical cable, batteries and the inverter compartment. The panels are often overlaid on the roof of the house for easy access to sun rays. How do solar inverters work? Usually, solar inverters are powered by heavy-duty batteries (usually the types used to power trucks), charged by solar energy. But this powering up usually begins from the panels that receive the solar energy from the sun. They now convert and transfer such energy into a form that can be received by batteries.
