For Borehole Drilling Services WhatsApp us on +263 To start with, lead- acid batteries have been used for decades and tend to be the cheapest solar battery option. Their prices range from \$220 to \$400 depending on size and capacity. However, because of their chemistry, they require more space per kWh storage than Lithium-ion batteries. This means If you know you use between 15-20KWh per day then you're going to have to work out how many batteries you need based on that. How you work this out will differ if you're relying entirely on solar for electricity compared to someone using solar as backup power.
