

Is there a business case for energy storage in the Netherlands? As mentioned above, there have been two major barriers, or stumbling blocks, to the business case for energy storage in the Netherlands to date. As of the beginning of , one of those has been eliminated, to the great relief of GIGA Storage and others in the industry. Is there a roadmap for energy storage in the Netherlands? In the Netherlands, there has also historically not been a roadmap or detailed industrial strategy with supportive legislation, policy, taxation reliefs, or investment incentives for the energy storage market. What do market participants want from energy storage solutions? Market participants also indicated that they wanted national targets set for energy storage solutions, and more efficient permitting procedures to support them in the development of storage assets. The government responded to some of the feedback from market participants, issuing its first Energy Storage Roadmap in June . Does the EU have a target for energy storage assets? While the EU Commission has not yet set specific targets for energy storage assets, as part of the electricity market reform plans they announced a list of recommendations on energy storage. These recommendations offer member states guidance on how best to exploit the potential of energy storage.
