

Should Guernsey have solar farms? In response to calls for solar farms in Guernsey, Little Green highlights the potential of brownfield developments for sustainable energy while advocating rooftop solar as the island's primary path to net-zero. They emphasize the need for environmentally responsible solutions, like agrivoltaics, to balance energy generation with land use.

How many solar panels are installed in Guernsey? Since , we've installed over 3.1 megawatts of energy generation capacity, equating to over 7,000 solar panels, all of which contribute to the States of Guernsey's ambitious net zero targets. We partner with brands like Maxeon SunPower and SolarEdge, giving clients access to the most trusted names in the industry.
