

## domestic energy storage tender price in Serbia 2030

What are the key priorities for energy development in Serbia? Energy security, energy market development, and overall transition to sustainable energy were adopted as key priorities for the energy development of the Republic of Serbia, as well as the principles upon which the energy policy until needed to be developed. Can Serbia accept high electricity prices from EU etc? For the Republic of Serbia, the use of very high current prices (expected to go even higher) from the EU ETC in the near future is not acceptable, the reason being the buyers of electrical energy can't accept high prices of electrical energy that will result from that. How does the transition of Serbia's energy sector affect prices? The transition of Serbia's energy sector, in the context of the implementation of a new energy strategy, takes place in the turbulent time, first due to changes in demand and the restructuring of global energy markets, and then due to a series of geopolitical challenges, leads to a sudden and uncertain increase in prices certain forms of energy. What is the trend of energy use in Serbia? The trend of changes in the use of energy sources in the Republic of Serbia from to is shown in Figure 1. There has been a slight decrease in the use of solid fossil fuels (coal) during this period. How is energy policy implemented in Serbia? The Energy Law envisages that energy policy is elaborated and implemented in more detail through the Energy Sector Development Strategy of the Republic of Serbia, the Strategy Implementation Program, and the Energy Balance of the Republic of Serbia. Why is the energy sector important in Serbia? The energy sector is the mainstay and support for the Republic of Serbia's overall economic and social development. Energy security, reliable and secure supply of adequate quantities and high-quality energy, and energy sources are the basic postulates of energy sector development. Energy security, energy market development, and overall transition to sustainable energy were adopted as key priorities for the energy development of the Republic of Serbia, as well as the principles upon which the energy policy until needed to be developed. Energy security, energy market development, and overall transition to sustainable energy were adopted as key priorities for the energy development of the Republic of Serbia, as well as the principles upon which the energy policy until needed to be developed. The conditions, relevant in , when the Energy Sector Development Strategy of the Republic of Serbia up to with projections up to (hereinafter: The previous Strategy) was adopted, have been significantly changed. Therefore, the new Energy Sector Development Strategy of the Republic of The state-owned company producer and supplier Elektroprivreda Srbije (EPS) continues to be a dominant player in the Serbian electricity market. The balancing market is operational but prices for balancing capacity, as well as for ancillary services are regulated by annual decisions of AERS. Such Investors in renewable energy sources (RES) in charge in Serbia, with new legal solutions, are imposing the obligation to have storage capacity so that their electricity production is aligned with consumption needs, but, according to the profession, the construction of reversible hydroelectric solar, and hydro power plants. However, to reach the greenhouse gas emissions target by , it is necessary to build a total of 21,000-22,000 MW of renewable energy in the European Energy Community. Serbia announced plans to install new hydropower plants and two existing dams, and to rehabilitate a further 15 With the
