What are the laws & regulations on energy storage in the Netherlands? No specific laws & regulations: In the Netherlands, energy storage is not described in Dutch laws and regulations as a specific item. Standard requirements: It has to meet standard requirements for production and consumption and some specific technologies that are part of the energy storage system must comply with standardisation. Why is energy storage important in the Netherlands? Energy storage can play a key role in contributing to solutions for shortages of capacity on the grid. It is therefore no surprise that we have seen the appetite for large-scale battery energy storage systems growing in the Netherlands. Is there a roadmap for energy storage in the Netherlands? In the Netherlands, there has also historically not been a roadmap or detailed industrial strategy with supportive legislation, policy, taxation reliefs, or investment incentives for the energy storage market. How does e-procurement work in the Netherlands? The Netherlands boasts a sophisticated government procurement system managing an annual budget exceeding EUR60 billion. Transparency and efficiency reign supreme, with an e-procurement platform called TenderNed facilitating open tendering for most contracts above EUR25,000. The following article provides an overview of the legislative framework in respect of battery storage in the Netherlands and explores the issues that should be taken into account when considering investing in energy storage in the Netherlands. The following article provides an overview of the legislative framework in respect of battery storage in the Netherlands and explores the issues that should be taken into account when considering investing in energy storage in the Netherlands. Public procurement law can play an important role in relation to energy storage projects. Therefore, it is advisable when developing an energy storage project, to check whether the Dutch Public Procurement Act applies. Pursuant to the Dutch Public Procurement Act, which incorporates EU procurement Based on supply and demand, the hourly market price for the following day is calculated. This is an energy-only market: only traded electricity (MWh) is calculated and not the available electricity (MW). Intraday market: Allows continuous buying or selling of power on a power exchange (EPEX SPOT) All Dutch authorities are obliged to publish their national and European tenders on TenderNed's announcement platform (in Dutch), so businesses can access all public publications from a single webpage. Using TenderNed, all parties can digitally manage all steps throughout the entire tender process. The Netherlands boasts a sophisticated government procurement system managing an annual budget exceeding EUR60 billion. Transparency and efficiency reign supreme, with an e-procurement
