

What is the electricity storage policy framework for Ireland? In line with CAP Action EL/24/16, the Electricity Storage Policy Framework for Ireland (ESPF) was published by my Department in July . The policy framework included 10 Government actions to support the role of electricity storage systems in Ireland's energy transition. Does Ireland need an energy storage policy? The Irish Government's Climate Action Plan set out the need for an energy storage policy for Ireland to support 75% reduction in power sector CO2 emissions by . There are 10 key policy actions in the framework outlining the timings and key stakeholders involved in delivering them. Key points: Should 'long duration' electricity storage systems be integrated into Ireland's Electricity Grid? In this regard, greater emphasis is placed on ensuring 'long duration' electricity storage systems - systems that have the capacity to deliver electricity throughout at least a four-hour period - are integrated into Ireland's electricity grid. What is Ireland's energy transition policy framework? The policy framework included 10 Government actions to support the role of electricity storage systems in Ireland's energy transition. Actions #6 to #10 of the policy framework are designed to stimulate the development of the optimum level of electricity storage systems, including Long Duration Electricity Storage on to the grid network by . Is Ireland a game changer for long duration energy storage? Ireland - A Game Changer for Long Duration Energy Storage? This is the first electricity storage policy published in Ireland. The Irish Government's Climate Action Plan set out the need for an energy storage policy for Ireland to support 75% reduction in power sector CO2 emissions by . Can energy storage save money in Ireland? By contributing to security of supply, helping to support renewable capacity, and displacing fossil fuels in the balancing market, energy storage can deliver a net saving to end consumers in Ireland of up to EUR85m per year. The Electricity Storage Policy Framework presents 10 government actions to support the role of electricity storage systems in Ireland's energy transition, identifying the key stakeholders and timelines for these actions. The Electricity Storage Policy Framework presents 10 government actions to support the role of electricity storage systems in Ireland's energy transition, identifying the key stakeholders and timelines for these actions. Electricity storage, which entails capturing electricity produced at one time for future use, will be a key element in the successful operation of our electricity network and will accelerate our use of renewable electricity, providing cheaper, greener electricity to the consumer. Grid scale The flexibility of storage systems and their ability to contribute to the energy, capacity and system services markets allows them to deliver a wide range of benefits to end consumers such as wholesale energy price reductions, reduced CO2 emissions and flexible system support services to help The publication of the update to the Shaping Our Electricity Future (SOEF v1.11) Roadmap in July captures changes to electricity policy and informs a pathway to achieving energy and climate ambitions and objectives across both jurisdictions. It builds on the previous Roadmap and plans for an The consultation seeks views on whether the arrangements for the procurement of system services, advance generation capacity, and flexibility services provide an effective marketplace for electricity storage units, whether arrangements adequately compensate storage units for system services, and The policy

framework is a first of kind policy, which clarifies the key role of electricity storage in Ireland's transition to an electricity-led system, supporting Ireland's climate targets, it may be considered as a steppingstone on Ireland's path to net zero carbon emissions. The Electricity Storage Policy Framework This is the first electricity storage policy published in Ireland. The Irish Government's Climate Action Plan set out the need for an energy storage policy for Ireland to support 75% reduction in power sector CO2 emissions by 2030. There are 10 key policy actions in the framework outlining the Electricity Storage Policy Framework The Electricity Storage Policy Framework presents 10 government actions to support the role of electricity storage systems in Ireland's energy transition, identifying the key Energy Storage Ireland To kick-start the process of developing a procurement framework for LDES we propose the publication of a Call for Evidence paper by the relevant Government departments in Ireland & A Call for Evidence on the Market Procurement Options for Electricity Storage and System Services in Ireland This call for evidence paper seeks to explore if there is a needs case for Long Duration Energy Storage (LDES), examining the potential barriers to investment, the services provided by Electricity Storage and System Services in Ireland Consultation is also expected soon on the procurement of Low Carbon Inertia Services. More imminent is the SEM Committee's decision, expected in late /early 2024, on DS3 System Services Tariffs for the Ireland - A Game Changer for Long Duration Energy Storage? The Irish Government's Climate Action Plan set out the need for an energy storage policy for Ireland to support 75% reduction in power sector CO2 emissions by 2030. Energy Policy - Thursday, 10 Apr - Parliamentary In line with Action #6, EirGrid, in conjunction with the Regulatory Authority, are developing a procurement mechanism for long-duration electricity storage, through their Long Government Contracts in Ireland: A Guide to Public Introduction Government contracts in Ireland are awarded through a structured public procurement process designed to ensure transparency, fairness, and value for money. Public sector Energy Storage Ireland Who we are // Energy Storage Ireland is a representative association of public and private sector organisations who are interested and active in the development of energy storage in Ireland and Northern Ireland. Our vision // Delivering the View and apply for eTenders The eTenders procurement website displays all Irish public sector procurement opportunities currently being advertised in the Official Journal of the European Union as well as
