

## household energy storage cost breakdown in Singapore 2025

Will Singapore see lower electricity and gas tariffs in 2025? Households in Singapore will see lower electricity and gas tariffs from January to March, marking the second consecutive quarter of decline due to reduced energy costs. What are Singapore household electricity tariffs per quarter? Graphic showing Singapore household electricity tariffs per quarter, from SP Group. City Energy, which supplies piped gas to homes in Singapore, also announced a decrease in the gas tariff for the first quarter of 2025. It will be adjusted from 22.97 cents per kWh to 22.72 cents per kWh, before GST. How will Singapore's electricity tariff change in 2025? Singapore, 30 December - For the period from 1 January to 31 March, the electricity tariff (before GST) for households will decrease by 3.4% or 0.98 cent per kWh compared with the previous quarter due to lower energy costs. The average monthly electricity bill for families living in HDB four-room flats will decrease by \$3.58 (before GST). How will Singapore's gas prices change in 2025? City Energy, which supplies piped gas to homes in Singapore, also announced a decrease in the gas tariff for the first quarter of 2025. It will be adjusted from 22.97 cents per kWh to 22.72 cents per kWh, before GST. This is a decrease of 0.25 cents per kWh. City Energy stated that lower fuel costs contributed to the price decrease. Why are Singapore's energy tariffs reducing? The tariff reductions provide financial relief for Singaporean households and businesses, fostering confidence in the nation's energy management systems. Lower costs are expected to positively impact other sectors reliant on energy consumption. The reduction in electricity and gas tariffs signals improved affordability in living expenses. Does Singapore have a lower electricity rate? This is the second consecutive quarter that the household electricity tariff has seen a decrease. The rate of 28.12 cents per kWh in the first quarter of 2025 is also lower than the rates in each of the four quarters of 2024. The last time Singapore saw a lower rate was in the third quarter of 2023, where the rates were 27.74 cents per kWh. The fuel cost is the cost of imported natural gas, which is tied to oil prices by commercial contracts. The cost of power generation covers mainly the costs of operating the power stations, such as the manpower and maintenance costs, as well as the capital cost of the stations.
