

residential ESS cost breakdown in Bangladesh 2025

Why are apartment prices rising in Bangladesh? Elevated construction costs and a slowdown in new development brought by administrative constraints continue to put upward pressure on apartment prices in the capital of Bangladesh, furthering the deficit of affordable housing amid rapid urbanization. Will construction market grow in Bangladesh in 2025? Construction market in Bangladesh is expected to grow by 10.4% on annual basis to reach BDT 4.58 trillion in 2025. The construction market in the country experienced robust growth during 2023, achieving a CAGR of 13.0%. This upward trajectory is expected to continue, with the market forecast to grow at a CAGR of 9.7% during 2024-2025. How has the housing market changed in Bangladesh? The development of the housing market in Bangladesh in recent decades has been determined by rapid population growth and urbanization. According to the results of the latest population and housing census, the country's overall population expanded by over 93 million since 2011 and reached 169.8 million in 2023. How many houses are there in Bangladesh in 2023? As of 2023, the total housing stock in Bangladesh stood at 35.6 million dwellings, of which about 8 million were urban dwellings. Only 22.5% of all dwellings are in stone/concrete structures (pucca), with a further 18.2% in structures of corrugated iron sheets (semi-pucca), and the remaining 59.4% represented by mud houses (katcha and jhupri). How many new apartments are needed in Bangladesh? A recent article on the issue in The Daily Star points out that Bangladesh requires around 100,000 new apartments every year, and while the developers believe they have the potential capacity to cover this demand, in reality, they are able to supply only 8% of the required units, leaving a substantial gap. Why is housing a problem in Bangladesh? The strong and growing demand for housing in cities across the country, created by rapid urbanization, has been outpacing new supply entering the market. The UN estimates the housing deficit in Bangladesh at about 6 million units, projected to rise to 10.5 million by 2030, with 70% of that unmet demand being for affordable options.
