The current Levelized Cost of Energy (LCOE) for a "PV + 4-hour storage" system has dropped to \$0.32/kWh--58% lower than traditional diesel generation. However, due to grid transmission constraints, over 50% of solar generation in the north is being curtailed. Studies suggest that increasing the solar-plus-storage site will combine a 220 MW solar plant with a 1 GWh battery energy storage system (BESS) as Chile continues to add renewables.
