Are solar batteries a good investment?

Section 5: Working out the costs and benefits of a solar battery system

A battery system can help some solar households cut their energy bills even further, if the estimated savings on electricity bills are higher than the upfront cost of the system. On this page

Are batteries a good investment for you right now? How much does a solar battery cost in Australia? Prices in Australia typically cost between \$870 - \$2,060 per kilowatt hours (kWh) of storage capacity. A solar battery and installation can cost up to \$12,000 or more in some cases. Solar battery storage technology has generated a lot of discussion within the energy industry in recent years, and for good reason. How can a solar battery save you money? reduce curtailment (likely to be only a small saving). A battery can store energy generated by your solar system for later use, when the solar system is not generating electricity. This increases solar self-consumption and reduces the amount of electricity you need to buy from your electricity retailer. Should you add a battery to your solar system? But the main reason people consider a battery is simple: they want to save money. The calculator lets you add a battery to your solar system and will show you the marginal battery payback. It's a fancy way of saying the calculator shows you the solar and battery savings and payback separately instead of blending the payback together. Which solar batteries are used in Australia? We have just selected products that are commonly used in the Australian market] For the 'small' solar battery system, we used Alpha ESS, which has a usable storage capacity of 5.7 kWh. All solar and battery output and technical information has been set in line with the verified product specifications published for each product. Our solar calculator provides you a complete picture of the savings and payback for solar power in Australia - with or without batteries. Simple to use. The solar calculator uses typical electricity costs for your area - but you can see what you actually pay on your bill. If you get quarterly bills - this is 4 bills. You may pay quite different amounts depending on the season - but a guesstimate here is fine. The calculator default is the average

In our calculator, we looked at various solar battery options and found the below options provided a good balance between grid energy independence and financial return.
