

total investment cost of BESS project in Finland

What is a Bess project?The 70 MW/140 MWh BESS project will be located in Nivala, northern Finland. Set to go online in , the facility will enhance grid stability, energy resilience and accelerate green electrification. The project marks Ingrid Capacity's first two-hour system and its debut in Finland. How does Bess work in Finland?BESS operators can also participate in cross-border markets to provide storage capacity for ancillary services, such as frequency regulation, which helps maintain grid stability and reliability. Ancillary services are currently the primary revenue source for BESS in Finland. Why does Finland need Bess?The need for BESS is exceptionally high in Finland because the country has set one of the world's most aggressive climate targets. The government has a legal obligation to reach carbon neutrality by . Renewable energy sources account for over 50% of electricity production, and several renewable projects are being planned or developed. How will the Finnish government help to accelerate Bess investments?Moreover, the Finnish government is improving policy support with tax exemptions for certain green investments, including battery storage, to meet the climate targets. These policies will help to accelerate BESS investments further by making them even more attractive financially. What is NTR's Bess project?The project marks NTR's first BESS venture in Finland, as well as the first battery storage investment from the Clean Power (Europe) Fund --a joint initiative between NTR and Legal & General. The fund recently closed with more than EUR600 million in commitments to support Europe's decarbonisation and energy security goals. When will the Bess be built?Construction is expected to start during Q2 , with operations of the BESS commencing in . Fu-Gen AG is a Swiss-based renewables developer and independent power producer with a strong track record of developing, financing, constructing, and operating renewable energy assets. The value of the engineering, procurement and construction (EPC) contract to Merus Power is EUR13 million (US\$13.6 million) and the project will be completed in spring . It will be built in Kaunola, Riihimäki and will mainly serve as a fast grid balancing unit in TSO Fingrid's The value of the engineering, procurement and construction (EPC) contract to Merus Power is EUR13 million (US\$13.6 million) and the project will be completed in spring . It will be built in Kaunola, Riihimäki and will mainly serve as a fast grid balancing unit in TSO Fingrid's For example, Finnish investment company Exilion achieved 40,700EUR/MW/month in the second half of . In , 113 MW BESS projects are expected to become operational, and 359 MW industrial-scale BESS projects have already been announced for the next five years (Elinkeinoelämäkeskusliitto,). Financial closure for the L& G NTR Clear Power (Europe) EUR600 million fund which foots the bill for NTR's flagship BESS project in Finland was agreed upon in April. At the table for this was NTR and Legal & General (L& G). The latter is a major global investor. NTR states that the investment not only The 70 MW/140 MWh BESS project will be located in Nivala, northern Finland.
