

turnkey business energy storage EPC contract price in Argentina

Contract prices settled between \$10,161 and \$12,815 per MW-month, comfortably below the reference price of \$15,000/MW-month set by CAMMESA, the market's administrator. This pricing dynamic signals both growing competition among developers and the increasing economic viability of battery energy storage. The AlmaGBA Storage tender, for the metropolitan area of Buenos Aires (AMBA), will pay a fixed \$10/MW of electricity supplied and energy storage capacity bids must have a maximum cost of \$15,000/MW/month. Argentina's Wholesale Electricity Market Administration Company (CAMMESA) has published a contract template to guide participants in the 500 MW battery energy storage system (BESS) tender opened in February. Argentina's 1st BESS tender awards 667 MW of projects. Argentina's government said on Monday it has awarded contracts for 667 MW of capacity in its first tender dedicated to battery energy storage systems (BESS), exceeding its original 500-MW target by about 30%. 1. INTRODUCTION The Battery Energy Storage System (BESS) will play an important role in the future smart grid. With the rapid development of battery technology, the BESS can bring more benefits for the owners, while its construction cost is decreasing in the energy storage market in H1. It is estimated that according to the Argentinian government, the investment in the BESS projects will surpass US\$540 million. The AlmaGBA tender was launched in February, with CAMMESA publishing last week the details for the awarded projects, including prices. The lowest price awarded was US\$10,161/MW/month, while the highest was US\$12,815/MW/month. The Ministry of Economy of Argentina has issued a national and international open call for "AlmaGBA Storage", aimed at contracting 500 MW of electric energy storage plants in critical nodes in the Metropolitan Area of Buenos Aires. The total investment is estimated at US\$500m and the battery storage capacity will be 1.3 GW. Argentina Awards 667 MW in First Battery Energy Storage Five technically qualified but initially non-awarded projects have been invited to join the programme at a fixed price of \$12,591 per MW-month, provided they accept the terms. Argentina publishes details of 500 MW battery tender. Argentina Receives 1.3GW of BESS Proposals for First-Ever The AlmaGBA tender not only signals growing investor confidence in Argentina's energy transition but also sets the stage for grid resilience and renewable integration. Argentina energy storage bidding MIO and spread bidding create potential financial and reliability risk. Storage resources are not strictly dispatched according to either their bids or to binding energy prices. Instead, real-time bidding creates potential financial and reliability risk.
