

wholesale Solar Panel price list in Belgium

How much do solar panels cost in Belgium? As of Apr , the average cost of solar panels in Belgium is \$2.48 per watt making a typical watt (6 kW) solar system \$10,421 after claiming the 30% federal solar tax credit now available. This is lower than the average price of residential solar power systems across the United States which is currently \$3.00 per watt. Can I install solar panels myself in Belgium? There are several companies active in Belgium that install solar panels. There are no conditions specifically for the installation of solar panels, so it is possible to install the solar panels yourself. However, it is advisable to have these works carried out by a recognized technician who can also carry out an inspection immediately. How much do solar panels cost? The price of solar panels has dropped significantly in recent years. In addition, you can receive a subsidy from the government for photovoltaic panels. The average solar panel price is around EUR1.26 per watt peak (Wp), although the exact price depends on a number of criteria: How much subsidy can I get for solar panels in Flanders? Currently, the maximum amount of subsidies you can receive for the instalment of solar panels in Flanders is EUR750. In the maximum subsidy will decrease to EUR375. The subsidy amount is always limited to 40% of the total investment costs including VAT, as stated on the invoices. What Is The Yield Of Solar Panels In Belgium? How long do solar panels last? Over the entire lifespan of solar panels, the efficiency for a properly functioning installation will be above 200%. The payback period is in most cases between six and ten years, where the lifespan of solar panels is about 25 years. It is not always possible to use all the electricity produced by the solar panels directly yourself. Do solar panels produce direct current? Solar panels produce direct current, but the current you use at home is alternating current. To convert the electricity generated by the solar panels into electricity that can be used in a home, an inverter must be installed. At least one inverter is required for each installation.
